NAME: - MIHIR CHOWDHURY

ROLL NO. : - 002011001040

ASSIGNMENT: - 06

TOPIC: - To improve color and brightness/contrast of old photographic images

Step 1: Open file CHEERS.TIF in Photoshop.

Step 2: Create a new adjustment layer by choosing Curves function.

Step 3: Set a white point by clicking the white eye-dropper tool on the white part of the window.

Step 4: Set a black point by clicking the black eye-dropper tool on the dark area just above the lady's elbow.

Step 5: To remove greenish tint, choose Green channel and move the middle point of the curve 5 to 7 increments to the right and down.

Step 6: To remove bluish tint, choose Red channel and move the middle point of the curve 5 to 7 increments to the up and to the left.

Step 7: Save as TASK10.PSD and TASK10.JPG.

Step 8: Remove the person in the background using the Clone Stamp tool.

Step 9: Save as TASK10_1.PSD and TASK10_1.JPG.
